

## Child Find

Child Find is a process designed to locate children birth to 21, with a suspected disability to evaluate and identify a need for special education and related services.

The Skykomish School District conducts specific activities for the purposes of locating, evaluating and identifying students ages birth to twenty-one with suspected disabilities and who reside within the district's boundaries. This includes students attending private schools. Approximately ten to fifteen percent of all children have a disability which hinders their educational development. Early identification of disabilities assists parents, students and schools in the design of appropriate educational services.

If your child is in school and you believe a disability may impair his or her educational performance, please contact the principal at your child's neighborhood school or the Director of Special Services at 360-677-2623.

If you have a concern about the way your child speaks, hears, sees, moves or interacts with family members and his or her environment, call Skykomish School District to schedule a free Child Find screening.
